

QM/QI Falls Tracking Tool

Directions:

- Review previous quarter’s QM/QI report and write down all residents that currently have a fall per the MDS; Place an “x” in each space where the resident qualifies for the QM/QI per the CASPER QM/QI Report for each quarter. (01 = New Admission)
- Identify any areas of concern in the comments box; process such issues as changes in the QM/QI reporting that may have impacted the fall; i.e. change in physical status, time of day, room, staff present or not, etc.
- Look for trends of residents that are falling; i.e. restraint use, incontinent, cognitively impaired. Look what the resident was doing prior to the fall.
- Test a preventative fall strategy on a small scale.

Resident	Quarter	Falls	What was resident doing prior to fall?					Associated QM/QIs																
			Toileting	Transferring	Reaching	Walking	Other	New Fracture	Depression	Problem Behavior	9+ Meds	B&B Incont.	Incont. No TP	UTIs	Weight Loss	Mod/Sev Pain	ADL Help ↑	↓ ROM	Move Ability ↓	Psych Drug Use			Little Activities	Phys Restraints
