- **Pros for Concurrent Sampling and Abstraction**
 - This approach provides opportunities for improvement at the point of care/service
 - Improves documentation
 - allows documentation to be added at the time of abstraction (could also be a con)
 - May allow multiple abstractors to work independently
- **Cons for Concurrent Sampling and Abstraction**
 - Must submit the actual population and sample counts - concurrent is based on estimated counts, may have to do additional retrospective sampling and abstraction
 - Allows for 'cherry picking' cases to sample
 - Risk abstracting cases that after final diagnosis coding do not meet the initial patient population criteria for the abstracted measure set
 - Allows documentation to be added after abstraction that could potentially change the measure outcome

Abstraction Tips/Hints, cont.

- **Decision time to admit:**
 - May use admit order time to admit unless earlier time is recorded.
- **Select “yes” to “Do you want to select another measure?”**

Validation

- **4Q 2010 - all selected IA/IL hospitals passed validation**
- **1Q 2011 - validation for selected IPPS is in process**
- **New list of IPPS hospitals selected for inpatient validation for FY 2014 (4Q 2011 – 3Q 2012) will be posted soon**
 - Selected hospitals for outpatient validation should be posted in early December 2011

Validation Mismatches - HOP

- **Top 3 hospital outpatient validation mismatches**
 1. Antibiotic Name
 2. ECG Date and Time
 3. ED Arrival time

HOP Pledging

- **CAHs are strongly encouraged to pledge to report outpatient data**
 - Sign the CY 2013 pledge on *My QualityNet*
 - If pledged before February 1, 2012 hospitals may submit data beginning with 3Q 2011 data
 - If pledged between February 2, 2012 and March 31, 2012 hospitals may submit data beginning with 4Q 2011 data
